vāk kṛṣṇasya vāk kṛṣṇasya. atra viṣṇupadānte harigadā-bādhanārtham idam sūtram. mātra-grahaṇād aviṣṇupadānte ca. udāharaṇam tv agre.

VRTTI—This sūtra is to prevent the change to harigadā by sūtra 61 when the viṣaya is viṣṇupadānta. Because the current sūtra contains the word mātra, it also applies when the viṣaya is not viṣṇupadānta.

 \triangleright vāk kṛṣṇasya \rightarrow (63) vāk kṛṣṇasya (the statement of Kṛṣṇa).

Examples of those when the visaya is not visaya are given in the $\bar{A}khy\bar{a}ta$ -prakarana.

AMRTA—This is an $apav\bar{a}da^{40}$ of $s\bar{u}tra$ 61. Someone might argue, "In the example $v\bar{a}k + krsnasya$ what is gained by ordaining $ka-r\bar{a}ma$ in place of $ka-r\bar{a}ma$?" Jīva Gosvāmī replies to that doubt, saying that this $s\bar{u}tra$ is for the sake of stopping the change to $harigad\bar{a}$. The implied meaning is that if this $s\bar{u}tra$ were not made, a $harigad\bar{a}$ would be achieved on the strength of $s\bar{u}tra$ 61 and the undesirable form $v\bar{a}g$ krsnasya would occur.

६४ । ततः शक्छो वा ।

64. tatah śaś cho vā

tatah—after that (a visnudāsa); śah—śa-rāma; chah—cha-rāma; vā—optionally.

Śa-rāma that comes after a viṣṇudāsa optionally becomes cha-rāma.

su-vāk śauriḥ, su-vāk chaurir vā. ap-śāyī, ap-chāyī vā.

Vṛtti \Rightarrow su-vāk + śauriḥ \rightarrow (63, 64) su-vāk chauriḥ or su-vāk śauriḥ (Śauri, the eloquent speaker). \Rightarrow ap + śāyī \rightarrow (63, 64) ap-chāyī or ap-śāyī (He who lies on the water, Nārāyana).

Samsodhini—In modern print *śa-rāma* only changes to *cha-rāma* when it comes after *ta-rāma*. The optional change to *cha-rāma* is not done in the case of any other *viṣnudāsa*.

६५ । हो हरिघोषः ।

65. ho harighosah

⁴⁰ An apavāda is an exception, a special rule which sets aside the general rule. See vṛṭṭi 50.

hah—ha-rāma; harighoṣah—harighoṣa.

Ha-rāma that comes after a viṣṇudāsa optionally becomes a harighoṣa.

vāk hareḥ vāg ghareḥ vāg hareḥ. ac-halau aj-jhalau aj-halau. ṣaṭ hareḥ ṣaḍ dhareḥ ṣaḍ hareḥ. tat halinaḥ tad dhalinaḥ tad halinaḥ. kakubh harasya kakub bharasya kakub harasya.

Vrtti—

- $\rightarrow v\bar{a}k + hareh \rightarrow (61) v\bar{a}g + hareh \rightarrow (65) v\bar{a}g ghareh or v\bar{a}g hareh (the statement of Hari).$
- \triangleright ac + halau \rightarrow (61) aj + halau \rightarrow (65) aj-jhalau or aj-halau (ac and hal).
- ightharpoonup sat + hare $h \to (61)$ sad + hare $h \to (65)$ sad-dhare h or sad-hare h (of the six Haris).
- \rightarrow tat + halina $\dot{h} \rightarrow$ (61) tad + halina $\dot{h} \rightarrow$ (65) tad dhalina \dot{h} or tad halina \dot{h} (that belongs to the holder of the plough, Balarāma).
- \rightarrow kakubh + harasya \rightarrow (61) kakub + harasya \rightarrow (65) kakub bharasya or kakub harasya (the region of Hara, Lord Śiva).

Samsodhini—These days the change to *harighosa* is always done.

६६ । दतौ परवर्णी लचटवर्गेषु नित्यम् ।

66. da-tau para-varnau la-ca-ţa-vargeșu nityam

da-tau—da-rāma and ta-rāma; para—following; varṇau—varṇa; la-ca-ṭa-vargeṣu—when la-rāma, ca-varga, or ṭa-varga follows; nityam—always.

Da-rāma and ta-rāma always change to the following varṇa when la-rāma, ca-varga, or ta-varga follows.

tad lakṣmī-pateḥ tal lakṣmī-pateḥ. tat catur-bhujasya tac catur-bhujasya. kamsa-jit chādayati, kamsa-jic chādayati. tat janārdanasya taj janārdanasya. kamsa-jit-jhankāraḥ kamsa-jijh-jhankāraḥ. kamsa-jij-jhankāraḥ. tad-ña-rāmaḥ tañ-ña-rāmaḥ. kamsa-jit ṭīkate kamsa-jit ṭīkate kamsa-jit ḍhaukate kamsa-jid ḍhaukate.

Vrtti—

- ➤ $tad + lak sm\bar{\imath}$ -pate $h \rightarrow (66)$ tal $lak sm\bar{\imath}$ -pateh (that belongs to the Lord of Lak sm $\bar{\imath}$).
- \rightarrow tat + catur-bhujasya \rightarrow (66, 63) tac catur-bhujasya (that belongs to the four-armed Lord Viṣṇu).

- \rightarrow kamsa-jit + chādayati \rightarrow (66) kamsa-jich chādayati \rightarrow (63) kamsa-jic chādayati (the conqueror of Kamsa covers).
- \rightarrow tat + janārdanasya \rightarrow (66) taj janārdanasya (that belongs to Janārdana).
- \blacktriangleright kamsa-jit + jhankāraḥ \rightarrow (66) kamsa-jijh jhankāraḥ \rightarrow (61) kamsa-jij jhankāraḥ (the conqueror of Kamsa hums).
- \rightarrow tad + $\tilde{n}a$ -r \tilde{a} ma $h \rightarrow$ (66) ta \tilde{n} - $\tilde{n}a$ -r \tilde{a} mah (the $\tilde{n}a$ -r \tilde{a} ma of that).
- $ightharpoonup kamsa-jit + t\bar{t}kate \rightarrow (66, 63) kamsa-jit t\bar{t}kate$ (the conqueror of Kamsa goes).
- \rightarrow kamsa-jit + dhaukate \rightarrow (66) kamsa-jidh dhaukate \rightarrow (61) kamsa-jid dhaukate (the conqueror of Kamsa approaches).

६७। तश्च शे।

67. taś ca śe

taḥ—ta-rāma; ca—ca-rāma; śe—when śa-rāma follows.

Ta-rāma becomes ca-rāma when śa-rāma follows.

tat śaureh tac śaureh. pakse chatvam, tac chaureh.

VRTTI \rightarrow tat + saureh \rightarrow (67, 63) tac + saureh \rightarrow (64) tac chaureh or tac saureh (it belongs to Sauri).

६८ । नोऽन्तश्रक्तयोः शरामः, टठयोः षरामः, तथयोः सरामः, विष्णुचक्रपूर्वो विष्णुचापपूर्वो वा ।

68. no 'ntaś ca-chayoḥ śa-rāmaḥ, ṭa-ṭhayoḥ ṣa-rāmaḥ, ta-thayoḥ sa-rāmaḥ, visnucakra-pūrvo visnucāpa-pūrvo vā

nah—na-rāma; antah—situated at the end of a viṣṇupada; ca-chayoh—when ca-rāma or cha-rāma follows; śa-rāmaḥ—śa-rāma; ṭa-ṭhayoh—when ṭa-rāma or ṭha-rāma follows; ṣa-rāmaḥ—ṣa-rāma; ta-thayoh—when ta-rāma or tha-rāma follows; sa-rāmaḥ—sa-rāma; viṣṇucakra-pūrvaḥ—preceded by a viṣṇucāpa; vā—or.

Na-rāma at the end of a viṣṇupada becomes śa-rāma when ca-rāma or cha-rāma follows, ṣa-rāma when ṭa-rāma or ṭha-rāma follows, and sa-rāma when ta-rāma or tha-rāma follows. And that śa-rāma, ṣa-rāma, or sa-rāma is preceded either by a viṣṇucakra or a viṣṇucāpa.

bhagavān calati, bhagavāms calati, bhagavās calati. bhagavān chādayati, bhagavāms chādayati, bhagavās chādayati. bhagavāms

tīkate, bhagavās tīkate. bhagavān thakkurah, bhagavāms thakkurah, bhagavās thakkurah. bhagavān tarati, bhagavāms tarati, bhagavās tarati. bhagavān thūt-karoti, bhagavāms thūt-karoti, bhagavās thūt-karoti.

Vrtti—

- $\gt bhagavān + calati \rightarrow (68) bhagavāms calati or bhagavās calati (Bhagavān moves).$
- > bhagavān + chādayati → (68) bhagavāmś chādayati or bhagavāś chādayati (Bhagavān covers).
- > bhagavān + tīkate \rightarrow (68) bhagavāms tīkate or bhagavās tīkate (Bhagavān goes).
- ► bhagavān + thakkurah \rightarrow (68) bhagavāms thakkurah or bhagavās thakkurah (Bhagavān is the deity).
- bhagavān + tarati → (68) bhagavāms tarati or bhagavās tarati (Bhagavān crosses).
- \blacktriangleright bhagavān thūt-karoti \rightarrow (68) bhagavārns thūt-karoti or bhagavās thūt-karoti (Bhagavān spits).

SAMŚODHINI—Because the form with a *viṣṇucāpa* is generally not seen in modern printed texts, this *sūtra* can be summarized as the following table.

n + c / ch	\rightarrow	<i>ṁ</i> ś + c / ch
n + t / th	\rightarrow	$\dot{m}\dot{s} + \dot{t}/\dot{t}h$
n + t / th	\uparrow	$\dot{m}s + t/th$

६९। ले लराम एव।

69. le la-rāma eva

le—when la-rāma follows; la-rāmah—la-rāma; eva—only.

Na-rāma at the end of a viṣṇupada becomes la-rāma when la-rāma follows.

bhagavān līlāyate bhagavāl līlāyate. atra "sthāne sadṛśatamaḥ" iti nyāyena sānunāsika eva la-rāmaḥ syāt. atra ya-va-lā hi dvi-vidhā matāḥ—sānunāsikā nir-anunāsikāś ca.

VRTTI—Here, by the maxim sthāne sadṛśatamaḥ (vṛtti 61), na-rāma only becomes a sānunāsika (with a viṣṇucāpa) la-rāma. In that regard, ya, va, and la are considered to be of two kinds: with an anunāsika (sānunāsika) (with a viṣṇucāpa) or without an anunāsika (nir-anunāsika).

 \blacktriangleright bhagavān + līlāyate \rightarrow (69) bhagavāl līlāyate (Bhagavān performs a pastime).

AMRTA—The nasality (anunāsikatvam) of na-rāma was explained in vṛtti 22. Thus, by the maxim sthāne sadṛśatamaḥ (vṛtti 61), the la-rāma ordained in the place of na-rāma is pronounced in the nose (nāsikā-bhava). And because la-rāma is a dental varṇa, it is also pronounced in the mouth (mukha-bhava). Therefore, because it is pronounced both in the nose and mouth (mukha-nāsikā-bhava), it is described as being sānunāsika.

७० । जझञशरामेषु ञरामः ।

70. ja-jha-ña-śa-rāmeṣu ña-rāmaḥ

ja-jha-ña-śa-rāmeṣu—when *ja-rāma*, *jha-rāma*, *ña-rāma*, or *śa-rāma* follows; *ña-rāmaḥ*—*ña-rāma*.

Na-rāma at the end of a viṣṇupada becomes ña-rāma when ja-rāma, jha-rāma, ña-rāma, or śa-rāma follows.

bhagavān jayati, bhagavāñ jayati. bhagavān jhaṣa-rūpī, bhagavāñ jhaṣa-rūpī. bhagavān ñunuve, bhagavāñ ñunuve. bhagavān śūraḥ, bhagavāñ śūraḥ.

Vrtti—

- \blacktriangleright bhagavān + jayati \rightarrow (70) bhagavāñ jayati (Bhagavān conquers).
- \rightarrow bhagavān + jhaṣa-rūpī \rightarrow (70) bhagavāñ jhaṣa-rūpī (Bhagavān in the form of a fish).
- ightharpoonup bhagavān + ñunuve → (70) bhagavān ñunuve (Bhagavān sounded).
- ► bhagavān + śūraḥ \rightarrow (70) bhagavāñ śūraḥ (Bhagavān is a hero).

७१। शे चान्तो वा।

71. śe cānto vā

śe—when śa-rāma follows; ca-antaḥ—one at whose end is ca-rāma; $v\bar{a}$ —optionally.

When $\dot{s}a$ - $r\bar{a}ma$ follows, na- $r\bar{a}ma$ at the end of a visnupada optionally becomes $\tilde{n}a$ - $r\bar{a}ma$ followed by ca- $r\bar{a}ma$. [This means it optionally becomes $\tilde{n}c$.]

bhagavān śūraḥ, bhagavāñc śūraḥ, bhagavāñ śūraḥ, chatve bhagavāñc chūraḥ.

Vrtti-

► bhagavān + śūra $h \rightarrow (71, 63)$ bhagavānc śūrah or (70) bhagavān śūrah.

Then, when śa-rāma becomes cha-rāma by tataḥ śaś cho vā (64):

 \blacktriangleright bhagavāñc śūra $h \rightarrow (64)$ bhagavāñc chūrah.

७२। मो विष्णुचक्रं विष्णुजने।

72. mo visnucakram visnujane

maḥ—ma-rāma; viṣṇucakram—viṣṇucakra; viṣṇujane—when a viṣṇujana follows.

Ma-rāma at the end of a viṣṇupada becomes viṣṇucakra when a viṣṇujana follows.

kṛṣṇam smarati, kṛṣṇam smarati. viṣṇujanād anyatra tu na—kṛṣṇam iccha, kṛṣṇam iccha.

VRTTI— \triangleright kṛṣṇam + smarati \rightarrow (72) kṛṣṇam smarati (he remembers Kṛṣṇa).

But ma-rāma at the end of a viṣṇupada does not become viṣṇucakra when something other than a viṣṇujana follows.

 \triangleright kṛṣṇam + iccha \rightarrow kṛṣṇam iccha (desire Kṛṣṇa!).

७३ । विष्णुचक्रस्य हरिवेणुर्विष्णुवर्गे ,विष्णुपदान्तस्य त् वा ।

73. viṣṇucakrasya hariveṇur viṣṇuvarge, viṣṇupadāntasya tu vā

viṣṇucakrasya—of viṣṇucakra; hariveṇur—hariveṇu; viṣṇuvarge—when a viṣṇuvarga follows; viṣṇupadāntasya—a viṣṇucakra situated at the end of a viṣṇupada; tu—but; vā—optionally.

Viṣṇucakra becomes a hariveṇu of the same varga as the following varṇa when a viṣṇuvarga follows. But this is optional for a viṣṇucakra situated at the end of a viṣṇupada.

aviṣṇupadāntodāharaṇam vakṣyate. kṛṣṇam kīrtayati, kṛṣṇan kīrtayati vā. rṣṇam bhajati, kṛṣṇam bhajati vā. samsāram tarati, samsāran tarati vā. atra ta-thayoḥ sa-rāma-niṣedho vaktavyaḥ. viṣṇuvarge iti kim? samvatsaraḥ.

Vṛtti—Examples of those when the *viṣaya* is not *viṣṇupadānta* will be given later.

- \rightarrow kṛṣṇam + kīrtayati \rightarrow (72) kṛṣṇam kīrtayati \rightarrow (73) kṛṣṇam kīrtayati or kṛṣṇan kīrtayati (he glorifies Kṛṣṇa).
- \rightarrow kṛṣṇam + bhajati \rightarrow (72) kṛṣṇam bhajati \rightarrow (73) kṛṣṇam bhajati or kṛṣṇam bhajati (he worships Kṛṣṇa).
- > $sams\bar{a}ram + tarati \rightarrow (72) sams\bar{a}ram tarati \rightarrow (73) sams\bar{a}ram tarati$ or $sams\bar{a}ran tarati$ (he crosses over material existence)

It is prohibited to apply ta-thayoh sa-rāmah (68) in cases like samsāran tarati. Why do we say "when a viṣṇuvarga follows"? Consider samvatsarah.

AMRTA—It should be construed from the word *viṣṇupadāntasya* in the second clause that in the first clause *viṣṇucakrasya* is *aviṣṇupadāntasya* (not situated at the end of a *viṣṇupadā*). Thus when the *viṣaya* is not *viṣṇupadānta* a *viṣṇucakra* always becomes the appropriate *hariveṇu*. Examples of this are *gantā*, *hantā*, and so on. The *na-rāma* in *saṃsāran* here does not become *sa-rāma* by *ta-thayoḥ sa-rāmaḥ* (68) due to the maxim *lākṣaṇika-pratipadoktayoḥ pratipadoktasyaiva grahaṇam* (*vṛtti* 59).

Samsodhini—Traditional Indian scholars tend to always exercise the option mentioned in this *sūtra* whereas modern Western scholars tend to never exercise it because it is easier to recognize words when the *sandhi* is not done. The standard of the Bhaktivedanta Book Trust, however, is to exercise the option when the *viṣnucakra* is inside a *samāsa* (compound word) but not when the *viṣnucakra* is the final *varṇa*. In this regard, it is explained later that all the constituent words that make up a *samāsa* are considered separate *viṣnupadas* and that *upasargas* (verbal prefixes) are also considered separate *viṣnupadas* since they are compounded with *dhātus* (verbal roots). Thus the Bhaktivedanta Book Trust would write *sankīrtana* instead of *samkīrtana*, *kinnara* instead of *kimnara* but *kim ca* instead of *kiñ ca*, *tam na* instead of *tan na*, and so on.

७४ । द्विः सर्वेश्वरमात्राच्छः ।

74. dvih sarveśvara-mātrāc chah

dvih—doubled; sarveśvara-mātrāt—after any sarveśvara; chah—cha-rāma.

Cha-rāma is reduplicated when it comes after any sarveśvara.

kṛṣṇa-chatram, kṛṣṇa-cchatram.

VṛTTI \rightarrow $kṛṣṇa + chatram \rightarrow$ (74) $kṛṣṇa-chchatram \rightarrow$ (63) kṛṣṇa-cchatram (Kṛṣṇa's umbrella).

७५ । विष्णुपदान्तात्त्रिविक्रमाद्वा ।

75. viṣṇupadāntāt trivikramād vā

viṣṇupadāntāt—situated at the end of a viṣṇupada; trivikramāt—after a trivikrama; vā—optionally.

Cha-rāma is optionally reduplicated when it comes after a trivikrama situated at the end of a viṣṇupada.

yamunā-chāyā, yamunā-cchāyā vā.

Vṛtti— \triangleright yamunā + chāyā \rightarrow (75) yamunā-chāyā or yamunā-chchāyā \rightarrow (63) yamunā-cchāyā (the beauty of the Yamunā).

AMRTA—But by the previous *sūtra*, *cha-rāma* is always reduplicated when it comes after a *trivikrama* that is not situated at the end of a *viṣṇupada*. The word *yamunā-chāyā* here means *yamunā-kāntih* (the beauty of the Yamunā). The *Amara-koṣa* gives the following definitions of the word *chāyā*: *chāyā sūrya-priyā kāntih pratibimbam anātapaḥ*, "The word *chāyā* can mean the wife of the sun-god, Chāyā; beauty; reflection; or shade."

७६ । वामनात्ङणना द्विः सर्वेश्वरे ।

76. vāmanāt na-na-nā dvih sarveśvare

vāmanāt—after a vāmana; na-na-nāḥ—na-rāma, na-rāma, and na-rāma; dvih—two; sarveśvare—when a sarveśvara follows.

Na-rāma, ṇa-rāma, and *na-rāma,* situated at the end of a *viṣṇupada,* are reduplicated when they come after a *vāmana* and a *sarveśvara* follows.

paryan anantaḥ, paryann anantaḥ. sugaṇ anantaḥ, sugaṇṇ anantaḥ. kurvan asti, kurvann asti. vāmanād anyatra tu na—bhagavān iha bhagavān iha. uṇādi-tinanta-sanantādayas tu sūtra-nirdeśa-balāt. katham vaḍabhī valabhī, paryankaḥ palyankaḥ, raghuḥ laghuḥ, kapirikā kapilikā ity-ādi? • da-layo ralayoś ca prāya-ekatva-śravaṇāt.

Vrtti-

- > paryan + anantah \rightarrow (76) paryann anantah (Ananta who is everywhere).
- > $sugan + anantah \rightarrow (76) sugann anantah (Ananta who counts well).$
- \triangleright kurvan + asti \rightarrow (76) kurvann asti (He is doing).

But they are not reduplicated if they come after something other than a $v\bar{a}mana$:

 \blacktriangleright bhagavān + iha \rightarrow bhagavān iha (Bhagavān is here).

But, on the strength of anityam sūtra-nirdeśe, "sandhi is optional in the composition of a sūtra" (Bṛhat 44), we also get words like uṇ-ādi, tin-anta, and san-anta.

Samsodhini—The word $v\bar{a}$ is not carried forward here because, in the *Bṛhat* version, the $s\bar{u}tra$ $\bar{a}n$ - $m\bar{a}nbhy\bar{a}m$ nityam comes in between the previous and current $s\bar{u}tras$ and the word nityam from that $s\bar{u}tra$ removes the anuvṛtti of the word $v\bar{a}$ from the previous $s\bar{u}tra$.

VRTTI—Why is there $vadabh\bar{\iota}$ and $valabh\bar{\iota}$ (a turret), paryankah and palyankah (a couch), raghuh and laghuh (light), $kapirik\bar{a}$ and $kapilik\bar{a}$ (reddish), and so on? Because it is heard [from previous authorities] that da- $r\bar{a}ma$ and la- $r\bar{a}ma$ and la- $r\bar{a}ma$ are practically one with each other [and thus interchangeable]. [It follows that da and ra too are interchangeable, as are ba and va.]

Samsodhini—This explanation accounts for the alternate spellings of various Sanskrit words. Thus, in the *Bhāgavatam*, we sometimes see *prahlāda* and sometimes see *prahrāda*. *Ba-rāma* and *va-rāma* can also be interchangeable, as in the words *bindu* and *vindu* (drop, dot), *bṛhat* and *vṛhat* (big), and so on. A good Sanskrit dictionary like that of Monier Williams will usually list both forms of these words.

७७ । ररामात्, सर्वेश्वरे तु हरिगोत्रं विना ।

77. ra-rāmāt [viṣṇujane viṣṇujano vā41], sarveśvare tu harigotram vinā

ra-rāmāt—after *ra-rāma*; *sarveśvare*—when a *sarveśvara* follows; *tu*—but; *harigotram—harigotra*; *vinā*—except.

A viṣṇujana that comes after ra-rāma can optionally be reduplicated when a viṣṇujana follows. And when a sarveśvara follows, a viṣṇujana, except a harigotra, that comes after ra-rāma can also optionally be reduplicated.

⁴¹ The words viṣṇujane viṣṇujano vā are carried forward from Bṛhat 120.

kārṣṣṇyam, kārṣṇyam vā. haryy-āsanam vā. "sarveśvare tu" ity-ādi kim? parāmarśaḥ, vārṣabhānavyāḥ, arhati.

Vrtti—

- \blacktriangleright $k\bar{a}rsnyam \rightarrow (77) k\bar{a}rssnyam$ or $k\bar{a}rsnyam$ (descendant of Kṛṣṇa).
- \rightarrow hary-āsanam (example from vṛtti 50) \rightarrow (77) haryy-āsanam or hary-āsanam (Hari's seat).

Why do we say "except a harigotra?" Consider parāmarśaḥ (inference), vārṣabhānavyāḥ (of Śrī Rādhā, the daughter of Vṛṣabhānu), and arhati (he deserves).

Samsodhini—Indian scholars tend to regularly exercise the option of reduplication, whereas western scholars tend to reject it since it can make the original word difficult to recognize. However, the reduplication reflects the pronunciation, because in usage, when 'r' is the first phoneme in a conjunct consonant, the stress of the pronunciation is laid on the phoneme after it.

७८ । विष्णुजनाद्विष्णुदासस्यादर्शनं सवर्गे विष्णुदासे ।

78. viṣṇujanād viṣṇudāsasyādarśanam sa-varge viṣṇudāse

viṣṇujanāt—after a viṣṇujana; viṣṇudāsasya—of a viṣṇudāsa; adarśanam—disappearance; sa-varge—of the same varga; viṣṇudāse—when a viṣṇudāsa follows.

A viṣṇudāsa that comes after a viṣṇujana optionally disappears when a viṣṇudāsa of the same varga follows.

bhagavāñc chūraḥ bhagavāñ chūro vā.

Vṛtti—> bhagavāñc chūraḥ (example from vṛtti 71) \rightarrow (78) bhagavāñc chūraḥ or bhagavāñ chūraḥ (the Lord is a hero).

SAMŚODHINĪ—*Adarśana* is the same thing as *hara* because *hara* is defined as *adarśana-mātra-hetur haraḥ* in *vṛtti* 39.

Vișnusarga-sandhih

Combination with the visarga

७९ । चछयोः शरामः ट्रठयोः षरामः तथयोः सरामः।

79. [viṣṇusargaḥ⁴²] ca-chayoḥ śa-rāmaḥ, ṭa-ṭhayoḥ ṣa-rāmaḥ, ta-thayoḥ sa-rāmah

ca-chayoḥ—when ca-rāma or cha-rāma follows; śa-rāmaḥ—śa-rāma; ṭa-thayoḥ—when ṭa-rāma or ṭha-rāma follows; ṣa-rāmaḥ—ṣa-rāma; ṭa-thayoḥ—when ta-rāma or tha-rāma follows; sa-rāmah—sa-rāma.

Viṣṇusarga becomes śa-rāma when ca-rāma or cha-rāma follows, ṣa-rāma when ṭa-rāma or ṭha-rāma follows, and sa-rāma when ṭa-rāma or ṭha-rāma follows.

kṛṣṇaḥ carati, kṛṣṇaś carati. kṛṣṇaḥ chādayati, kṛṣṇaś chādayati. kṛṣṇaḥ ṭīkate, kṛṣṇaṣ ṭīkate. kaḥ ṭha-rāmaḥ, kaṣ ṭha-rāmaḥ. kṛṣṇaḥ tarati, kṛṣṇas tarati. kṛṣṇaḥ thūt-karoti, kṛṣṇas thūt-karoti.

VRTTI \rightarrow kṛṣṇaḥ + carati \rightarrow (79) kṛṣṇaś carati (Kṛṣṇa roams about).

- ➤ kṛṣṇaḥ + chādayati → (79) kṛṣṇaś chādayati (Kṛṣṇa covers).
- $ightharpoonup kṛṣṇaḥ + t̄tkate <math>\rightarrow$ (79) kṛṣṇaṣ t̄tkate (Kṛṣṇa goes).
- $ightharpoonup kaḥ + tha-rāmaḥ \rightarrow (79) kaṣ tha-rāmaḥ (ka-rāma, tha-rāma).$
- $ightharpoonup kṛṣṇaḥ + tarati \rightarrow (79) kṛṣṇas tarati (Kṛṣṇa crosses).$
- \triangleright kṛṣṇaḥ + thūt-karoti \rightarrow (79) kṛṣṇas thūt-karoti (Kṛṣṇa spits).

Samsodhini—Usually the *viṣṇusarga* remains unchanged when *ś*, *s*, *s*, *k*, *kh*, *p*, or *ph* follow. There are special rules mentioned in the *Brhat* version of the *Hari-nāmāmṛta-vyākaraṇa*, however, that prescribe optional changes under certain conditions. See *Bṛhat sūtras* 131, 132, and 138.

८०। आदरामगोपालयोरुर्नित्यम्।

80. ād a-rāma-gopālayor ur nityam

āt—after a-rāma; a-rāma-gopālayoḥ—when a-rāma or a gopāla follows; uḥ—u-rāma; nityam—always.

⁴² The word *viṣṇusargaḥ* is carried forward from *viṣṇusargo jihvāmūlīyaḥ ka-khayor vā* (*Bṛhat* 131).

A viṣṇusarga that comes after a-rāma always becomes u-rāma when a-rāma or a $gop\bar{a}la$ follows.

kṛṣṇah atra, kṛṣṇo 'tra. kṛṣṇah gacchati, kṛṣṇo gacchati.

Vrtti-

- \blacktriangleright kṛṣṇaḥ + atra \rightarrow (80) kṛṣṇa + u + atra \rightarrow (44) kṛṣṇo + atra \rightarrow (56) kṛṣṇo 'tra (Kṛṣṇa is here).
- $> kṛṣṇaḥ + gacchati \rightarrow (80) kṛṣṇa + u + gacchati \rightarrow (44) kṛṣṇo gacchati (Kṛṣṇa goes).$

८१ । अद्वयभोभगोअघोभ्यो लोप्यः, सर्वेश्वरे तु यश्च, न च लोपे सन्धिः ।

81. a-dvaya-bho-bhago-aghobhyo lopyaḥ [sarveśvara-gopālayoḥ], sarveśvare tu yaś ca, na ca lope sandhiḥ

a-dvaya-bho-bhago-aghobhyaḥ—after a-dvaya, or after bho, bhago, or agho; lopyaḥ—deleted; sarveśvare—when a sarveśvara follows; tu—but; yaḥ—ya-rāma; ca—also; na—not; ca—and; lope—when there is deletion; sandhiḥ—sandhi.

A viṣṇusarga that comes after a-dvaya, bho, bhago, or agho is deleted when a sarveśvara or gopāla follows. But when a sarveśvara follows, it can also become ya-rāma. When the viṣṇusarga is deleted, there is no further sandhi.

kṛṣṇaḥ iha, kṛṣṇa iha, kṛṣṇay iha. kṛṣṇāḥ atra, kṛṣṇā atra, kṛṣṇāy atra. bhoḥ ananta, bho ananta, bhoy ananta. bhagoḥ ananta, bhago ananta, bhagoy ananta. aghoḥ avaiṣṇava, agho avaiṣṇava, aghoy avaiṣṇava. gopāle na yarāmaḥ. kṛṣṇā gacchanti. bho govinda. bhago govinda. agho hari-vimukha. "ād a-rāma-gopālayoḥ" iti viśeṣa-vidhānān neha—kṛṣṇo 'tra, kṛṣṇo gacchati. saḥ eṣaḥ sa eṣaḥ.

Vrtti—

- $ightharpoonup kṛṣṇaḥ + iha \rightarrow (81) kṛṣṇa iha or kṛṣṇay iha (Kṛṣṇa is here).$
- $ightharpoonup kṛṣṇāḥ + atra \rightarrow (81) kṛṣṇā atra or kṛṣṇāy atra (the Kṛṣṇas are here).$
- \blacktriangleright bhoh + ananta \rightarrow (81) bho ananta or bhoy ananta (O Ananta).
- \blacktriangleright bhagoh + ananta \rightarrow (81) bhago ananta or bhagoy ananta (O Bhagavān Ananta).
- \Rightarrow aghoh + avaiṣṇava \rightarrow (81) agho avaiṣṇava or aghoy avaiṣṇava (O sinful non-devotee).

The viṣṇusarga does not become ya-rāma when a gopāla follows:

- $ightharpoonup kṛṣṇāh + gacchanti \rightarrow (81) kṛṣṇā gacchanti (the Kṛṣṇas go).$
- \blacktriangleright bhoh + govinda \rightarrow (81) bho govinda (O Govinda).
- ➤ bhagoḥ + govinda → (81) bhago govinda (O Bhagavān Govinda).
- \rightarrow aghoh + hari-vimukha \rightarrow (81) agho hari-vimukha (O sinful person averse to Hari).

Because of the specific prescription $\bar{a}d$ a- $r\bar{a}ma$ - $gop\bar{a}layoh$ (80), the current $s\bar{u}tra$ does not apply in: krsnah + atra, nor in: krsnah + gacchati.

$$ightharpoonup sah + eṣah \rightarrow (81) sa eṣah.$$

AMRTA—The plural form *kṛṣṇāh* (the Kṛṣṇas) found in the examples above refers to the *rāsa-līlā* or Kṛṣṇa's marrying of many girls simultaneously.

A viṣṇusarga that comes after a-rāma is deleted only when a sarveśvara other than a-rāma follows because the prescription of viṣṇusarga becoming u-rāma when a-rāma follows (sūtra 80) is more specific than what is prescribed in the current sūtra. That the viṣṇusarga is ordained to become ya-rāma only when a sarveśvara follows implies that it does not become ya-rāma when a gopāla follows.

८२। एषसपरो विष्णुजने।

82. eṣa-sa-paro viṣṇujane

eṣa-sa-paraḥ—after eṣa or sa; viṣṇujane—when a viṣṇujana follows.

A viṣṇusarga coming after eṣa or sa is deleted when a viṣṇujana follows.

etac-chabdasya eṣa ity asmāt tac-chabdasya sa ity asmāc ca paro viṣṇusargo lopyaḥ syād viṣṇujane pare. eṣaḥ kṛṣṇaḥ, eṣa kṛṣṇaḥ. saḥ rāmaḥ, sa rāmaḥ.

Vṛtti—A viṣṇusarga coming after either eṣa, a form of the word etad (this), or sa, a form of the word tad (that), is deleted when a viṣṇujana follows.

- ightharpoonup eşah kṛṣṇaḥ (this is Kṛṣṇa).
- > $sah r\bar{a}mah \rightarrow (82) sa r\bar{a}mah$ (that is Rāma).

८३। र ईश्वरात्सर्वेश्वरगोपालयोः ।

83. ra īśvarāt sarveśvara-gopālayoḥ

raḥ—ra-rāma; iśvarāt—after an iśvara; sarveśvara-gopālayoḥ—when a sarveśvara or gopāla follows.

After an *īśvara*, *viṣṇusarga* becomes *ra-rāma* when a *sarveśvara* or *gopāla* follows.

hareh idam, harer idam. harih gacchati, harir gacchati.

```
VRTTI \rightarrow hareh + idam \rightarrow (83) harer idam (this is Hari's). \rightarrow harih + gacchati \rightarrow (83) harir gacchati (Hari goes).
```

८४ । अनीश्वरादपि ररामजः ।

84. anīśvarād api ra-rāma-jaḥ

an-iśvarāt—not after an iśvara; api—also; ra-rāma-jaḥ—born of ra-rāma.

Whether it comes after an *īśvara* or not, a *viṣṇusarga* born of *ra-rāma* becomes *ra-rāma* when a *sarveśvara* or a *gopāla* follows.

prātah atra, prātar atra. giḥ mukundasya, gīr mukundasya. bhrātah vraje, bhrātar vraje. bhrātah govindam paśya, bhrātar govindam paśya.

Vrtti-

- \rightarrow prātah + atra \rightarrow (84) prātar atra (in the morning, here).
- $ightharpoonup gih + mukundasya \rightarrow (84)$ gir mukundasya (the statement of Mukunda).
- \rightarrow bhrātaḥ + vraje \rightarrow (84) bhrātar vraje (O brother in Vraja).
- $ightharpoonup bhrātaḥ + govindam paśya <math>\rightarrow$ (84) bhrātar govindam paśya (O brother, look at Govinda)

AMRTA—This is an *apāvada* of all the previous $s\bar{u}tras$. Thus, in *bhrātaḥ* + $vraje \rightarrow (84)$ *bhrātar vraje*, the viṣṇusarga does not become u- $r\bar{a}ma$ by $s\bar{u}tra$ 80 nor is it deleted by $s\bar{u}tra$ 81.

Samśodhini—Words like *prātar*, *svar*, *antar*, *punar*, and so on, originally end in *ra-rāma*, but this *ra-rāma* becomes *viṣṇusarga* by *sa-ra-rāmayor viṣṇusargo viṣṇupadānte* (93). Then, by this *sūtra*, that *viṣṇusarga* again becomes *ra-rāma* when a *sarveśvara* or *gopāla* follows. The word *prātar* (in the early morning, at dawn) is an *avyaya* ending in *ra-rāma*.

The word *gir* (speech) is a *kṛdanta* (verbal noun) whose derivation is explained in *Samśodhinī* 212. The *i-rāma* of *gir* becomes *trivikrama* by *ir-ur-anta-dhātor uddhavasya trivikramo viṣṇupadānte* (207). The word *bhrātar* is the vocative singular of the word *bhrātṛ* (brother).

८५ । अह्नो विष्णुसर्गस्य रो रात्रिरूपरथन्तरादन्येषु ।

85. ahno viṣṇusargasya ro rātri-rūpa-rathantarād anyeṣu

ahnah—of the word ahan (a day); viṣṇusargasya—of the viṣṇusarga; rah—ra-rāma; rātri-rūpa-rathantarāt—than the words rātri (night), rūpa (form), or rathantara (the name of various sāmas (Vedic songs of praise)); anyeṣu—when something other follows.

The visnus arga of the word ahan becomes $ra-r\bar{a}ma$ when something other than the words $r\bar{a}tri$, $r\bar{u}pa$, and rathantara follows.

ahaḥ ahaḥ, ahar ahaḥ. ahaḥ-gaṇaḥ, ahar-gaṇaḥ. sarveśvara-gopālayor eva. neha—ahaḥ-patiḥ. rātry-ādau tu na—aho-rātriḥ. Deka-deśa-vikṛtam ananya-vat —aho-rātraḥ. aho-rūpam, aho-rathantaram sāma.

Vrtti-

- \rightarrow ahaḥ ahaḥ \rightarrow (85) ahar ahaḥ (daily, every day).
- \rightarrow ahaḥ-gaṇaḥ \rightarrow (85) ahar-gaṇaḥ (a month, a series of days).

This $s\bar{u}tra$ is applicable only when a sarve svara or a $gop\bar{a}la$ follows. Thus it does not apply in ahah-patih. But the visnus arga does not become $ra-r\bar{a}ma$ when the words $r\bar{a}tri$ and so on follow.

 \rightarrow ahaḥ + rātriḥ \rightarrow (80) aha + u + rātriḥ \rightarrow (44) aho-rātriḥ (day and night).

Eka-deśa-vikṛtam ananya-vat: "That which is deficient in one place is not considered a different thing."

- \rightarrow ahah + $r\bar{a}trah \rightarrow (80)$ aha + $u + r\bar{a}trah \rightarrow (44)$ aho- $r\bar{a}trah$ (day and night).
- \rightarrow ahah + $r\bar{u}pam \rightarrow (80)$ aha + $u + r\bar{u}pam \rightarrow (44)$ aho- $r\bar{u}pam$ (the form of day).
- \rightarrow ahah + rathantaram sāma \rightarrow (80) aha + u + rathantaram sāma \rightarrow (44) aho-rathantaram sāma (the Vedic hymn (sāma) named Aho-rathantara).

AMRTA—The word viṣṇusargasya in this sūtra means "the viṣṇusarga caused by ahno viṣṇusargo viṣṇupadānte (216)." The viṣṇusarga of ahan becomes ra-rāma only when the sv-ādi (nominal suffix) [s]u that comes after the word ahan has undergone mahāhara by brahmataḥ sv-amor mahāharaḥ (166). Indeed the current sūtra is not applicable when the sv-ādi remains. Jīva Gosvāmī makes the same restriction in the sūtra asya svādy-abhāva eva ra-vidhir vācyaḥ (Bṛhat 288) which means "only in the absence of a sv-ādi does the viṣṇusarga formed from the n of ahan change to r by sūtra 85."

With the clause "only when a sarveśvara or gopāla follows," Jīva Gosvāmī informs us that the para-nimitta sarveśvara-gopālayoḥ is carried forward here. Someone might argue, "In the sūtra only the word rātri is excluded. Therefore sandhi should certainly occur when the word rātra follows." Jīva Gosvāmī refutes this on the strength of the paribhāṣā beginning with eka-deśa. Just as a person who loses his eye or other bodily parts is not considered a different person, similarly the word rātra is considered non-different from the word rātri even though it lacks i-rāma.

८६। रो रे लोप्यः, पूर्वश्च त्रिविक्रमः।

86. ro re lopyah, pūrvaś ca trivikramah

raḥ—ra-rāma; re—when *ra-rāma* follows; *lopyaḥ*—is deleted; *pūrvaḥ*—a previous *vāmana; ca*—and; *trivikramaḥ—trivikrama*;

Ra-rāma is deleted when ra-rāma follows, and the vāmana before it becomes trivikrama.

bhrātaḥ rāmānujam paśya, bhrātā rāmānujam paśya. hariḥ rādhā-priyaḥ harī rādhā-priyaḥ. iti viṣṇusarga-sandhiḥ. iti śrī-śrī-harināmāmṛtākhye vaiṣṇava-vyākaraṇe samjñā-sandhi-prakaraṇam prathamam samāptam.

Vrtti—

> bhrātaḥ + rāmānujam paśya → (84) bhrātar + rāmānujam paśya → (86) bhrātā rāmānujam paśya (O brother, see the younger brother of Rāma). > hariḥ + rādhā-priyaḥ → (83) harir + rādhā-priyaḥ → (86) harī rādhā-priyaḥ (Hari is the beloved of Rādhā).

Thus ends viṣṇusarga-sandhi. Here ends the $Samj\~n\=a-sandhi-prakaraṇa$, the first prakaraṇa in the Vaiṣṇava grammatical treatise called $Śr\=i$ $Śr\=i$ $Hari-n\=am\=amrta$.

Chapter Two

Nāma-viṣṇupada-prakaraṇam Noun declension

य एकः सर्वरूपाणां सर्वनाम्नां तथाश्रयः । तस्य विष्णोः पदं सर्वं विष्णुभक्त्या निरूप्यते ॥

ya ekaḥ sarva-rūpāṇām sarva-nāmnām tathāśrayaḥ tasya viṣṇoḥ padam sarvam viṣṇu-bhaktyā nirūpyate

yaḥ—who; ekaḥ—only; sarva-rūpāṇām—of all inflected words (or of all forms); sarva-nāmnām—of all nāmas (nominal bases) (or of all names); tathā—and; āśrayaḥ—shelter; tasya—that; viṣṇoḥ—of Viṣṇu; padam—inflected word (or abode); sarvam—all; viṣṇu-bhaktyā—by a viṣṇubhakti (a nominal or verbal suffix) (or by devotional service to Viṣṇu); nirūpyate—achieved, or perceived.

Lord Viṣṇu is the only shelter of all inflected words $(r\bar{u}pa)$ and nominal bases $(n\bar{a}ma)$. Every inflected word (pada) refers to Him $(Viṣṇu)^{43}$ and is achieved through the application of a nominal suffix (viṣṇubhakti).

Alternatively: Lord Viṣṇu is the only shelter of all forms and names. All His abodes (viṣṇu-padas) are perceived through devotional service (viṣṇu-bhakti).

atha nāma-jāni viṣṇupadāni. nāmno jātāni yāni viṣṇupadāni athānantaram tāni nirūpyante.

Now the vispupadas (inflected words) produced from a $n\bar{a}ma$ (nominal base) are going to be described.

AMRTA—Grammatically, the word *sarva-rūpāṇām* means "of all inflected words, like *kṛṣṇaḥ* and so on, and *bhavati* and so on," and the word *sarva-nāmnām* means "of all nominal bases, beginning with *tad*, *yuṣmad*, and *asmad*, which express the *prathama-puruṣa* (third person), *madhyama-puruṣa* (second person), and *uttama-puruṣa* (first person) respectively."

⁴³ Thus they are called *visnu-padas* (inflected words related to Lord Visnu).

There are two kinds of visnupadas (inflected words): those produced from $n\bar{a}mas$ (nominal bases) and those produced from $dh\bar{a}tus$ (verbal bases). Jīva Gosvāmī first describes those produced from $n\bar{a}mas$ as they are formed with less effort. He will describe those produced from $dh\bar{a}tus$ in the next chapter, the $\bar{A}khy\bar{a}ta-prakarana$.

Sarveśvarāntāh puruşottama-lingāh

Masculine words ending in a vowel

८७ । अधातुविष्णुभक्तिकमर्थवन्नाम ।

87. adhātu-visnubhaktikam arthavan nāma

a-dhātu-viṣṇubhaktikam—except *dhātus* (verbal roots) and *viṣṇubhaktis* (nominal or verbal suffixes); *artha-vat*—having meaning; *nāma*—a nominal base.

Any word that has meaning, except for *dhātus* and *viṣṇubhaktis*, is called a *nāma*.

bhū-sanantādyā dhātavaḥ. sv-ādi-tib-ādyā viṣṇubhaktayaḥ. "vibhaktayaḥ" iti prāncaḥ. tān dhātūn tā viṣṇubhaktīś ca varjayitvā yad artha-yuktam śabda-rūpam tan nāma-samjñam syāt. "lingam" ity eke "prātipadikam" ity anye. te cārthā dravya-guṇa-jāti-kriyāḥ. tad-yuktam tad-abhidhāyakam śabda-rūpam ity arthaḥ. dravyam parameśvaram ārabhya mṛn-maya-paryantam sarvam vastu. guṇas tad-āśrayī, aiśvaryādi-śabda-sparśādiko dharmaḥ. jātiḥ samānatvam, brāhmaṇatva-gotvādi. kriyā dhātv-arthaḥ, sattāhāra-jñāna-vihāra-prabhrtiḥ.

VRTTI—Bhū and so on and san-anta and so on are called dhātus. Sv-ādis (nominal suffixes) and tib-ādis (verbal suffixes) are called viṣṇubhaktis. Earlier grammarians called them vibhaktis. Any word that has artha (meaning), except for dhātus and viṣṇubhaktis, is called a nāma. Some use the term liṅga; others use prātipadika. The arthas are dravya (a substance, person, or thing), guṇa (a quality), jāti (class, category, species), and kriyā (action, mode of being). Thus arthavat refers to a word endowed with one of these arthas, that is, a word that expresses one of these arthas. Dravya is everything from the Supreme Lord to things composed of earth. Guṇa is that which inheres in a dravya. Characteristics like sovereignty, and the sense objects such as sound and touch are guṇas. Jāti is the sameness such as Brāhmaṇahood or cowness. Kriyā is the meaning of a verb, such as being, eating, knowing, strolling, and so on.

Amrta—The word *viṣṇubhaktika* is formed by applying the *taddhita* suffix *ka* to the word *viṣṇubhakti*, without a change in meaning. Thus *viṣṇubhaktika* means *viṣṇubhakti*. By extension, the word *viṣṇubhakti* also refers to that which ends in a *viṣṇubhakti* — a *viṣṇupada* (inflected word). Thus this *sūtra* also excludes *viṣṇupadas* like *kṛṣṇaḥ*, *bhavati*, and so on, from being *nāmas*.

The word samānatvam (sameness, i.e. sameness in quality) is a gloss of the word jāti. The actual definition of a jāti is given in vṛtti 1094 of the Taddhita-prakaraṇa: ākṛti-grahaṇā jātiḥ ... sakṛd-ākhyāta-nirgrāhyā, "A jāti is that which is understood simply by means of the form, and having been described once it should be recognizable in all cases." For example, if somebody says that a form containing a dewlap, two horns, four legs, and a tail is a cow, then the next time we see such a form we should automatically understand, "This is a cow." According to the adherents of Nyāya philosophy, something is a jāti (category) if it exists in many and is always present somewhere at any given time. For example, brāhmaṇatvam (Brāhmaṇahood) is a jāti because the quality of being generated from the mouth of the Supreme Lord exists in every brāhmaṇa. Similarly, gotvam (cowness) is a jāti because the quality of having a large dewlap is present in all cows. Jātis like brāhmaṇatvam and gotvam are considered eternal because the totality of brāhmaṇas and cows don't simultaneously perish when an individual brāhmaṇa or cow perishes.

८८ । प्रकृतिः पूर्वा ।

88. prakṛtiḥ pūrvā

prakrtih—prakrti (base, the original word to which suffixes are added); $p\bar{u}rv\bar{a}$ —the first part.

The first part [of a viṣṇupada] is called the prakṛti.

sā ca nāma-dhātu-bhedād dvi-vidhā.

Vṛtti—There are two kinds of *prakṛtis: nāmas* (nominal bases) and *dhātus* (verbal bases).

८९ । प्रत्ययः परः ।

89. pratyayah parah

pratyayah—pratyaya (suffix); parah—the later part.

The second part [of a viṣṇupada] is called the pratyaya.

sa ca svādy-ākhyāta-kṛt-taddhita-bhedāc catur-vidhaḥ.

VRTTI—There are four kinds of *pratyayas*: sv- $\bar{a}di$ (nominal suffix), $\bar{a}khy\bar{a}ta$ (verbal suffix), krt (suffix used to form a $n\bar{a}ma$ from a $dh\bar{a}tu$), and taddhita (suffix used to form a $n\bar{a}ma$ from another $n\bar{a}ma$).

९०। तत्र नाम्नः सु औ जस्, अम् औ शस्, टा भ्याम् भिस्, ङे भ्याम् भ्यस्, ङिस भ्याम् भ्यस् , ङस् ओस् आम्, ङि ओस् सुप्।

90. tatra nāmnaḥ su au jas, am au śas, ṭā bhyām bhis, ṅe bhyām bhyas, ṅasi bhyām bhyas, ṅas os ām, ṅi os sup

tatra—there, among nāmas and dhātus (see vṛtti 88); nāmnaḥ—after a nāma; su au jas, am au śas, tā bhyām bhis, ne bhyām bhyas, nasi bhyām bhyas, nas os ām, ni os sup—the viṣnubhaktis su, au, jas, am, au, śas, tā, bhyām, bhis, ne, bhyām, bhyas, nasi, bhyām, bhyas, nas, os, ām, ni, os, and sup.

The viṣṇubhaktis applied after a nāma are as follows: su, au, jas, am, au, śas, ṭā, bhyām, bhis, ne, bhyām, bhyas, nasi, bhyām, bhyas, nas, os, ām, ni, os, sup.

etāḥ su ity-ādaya eka-vimśatir viṣṇubhaktayaḥ praty-ekam nāmnaḥ pare syuḥ. tāsu ca su au jas prathamā. am au śas dvitīyā. ṭā bhyām bhis tṛtīyā. ne bhyām bhyas caturthī. nasi bhyām bhyas pañcamī. nas os ām ṣaṣṭhī. ni os sup saptamī. tatra prathamāyā eka-vacanam su, dvi-vacanam au, bahu-vacanam jas. dvitīyaika-vacanam am, dvi-vacanam au, bahu-vacanam śas ity-ādi jñeyam. etāḥ sv-ādayaḥ. sup ity eke.

VRTTI—The twenty-one viṣṇubhaktis, beginning with su, can each be applied after a nāma. Among them su, au, and jas are called prathamā (first case); am, au, and śas, dvitīyā (second case); tā, bhyām, and bhis, tṛtīyā (third case); ne, bhyām, and bhyas, caturthī (fourth case); nasi, bhyām, and bhyas, pañcamī (fifth case); nas, os, and ām, ṣaṣṭhī (sixth case); and ni, os, and sup, saptamī (seventh case). Among these seven cases the eka-vacana (singular) of prathamā is su, the dvi-vacana (dual) is au, and the bahuvacana (plural) is jas. The eka-vacana of dvitīyā is am, the dvi-vacana is au, and the bahu-vacana is śas. The others are divided in the same way. These twenty-one viṣṇubhaktis are called sv-ādis (those beginning with su). Pāṇini calls them sup.

Samsodhini—Two kinds of *prakrtis, nāmas* and *dhātus,* were mentioned in *vṛtti* 88, and two kinds of *viṣnubhaktis*, the *sv-ādis* and the *tib-ādis*, were

mentioned in *vṛtti* 87. With the phrase *tatra nāmnaḥ*, Jīva Gosvāmī selects *nāmas* as the current subject of discussion and explains that the *sv-ādis* are applied after them. He will deal with *dhātus* and the *tib-ādis* in the next chapter, the *Ākhyāta-prakaraṇa*.

९१। तत्र जटशङपा इतः , उश्च सोः , ङसेरिश्च ।

91. tatra ja-ţa-śa-na-pā itaḥ, uś ca soḥ, naser iś ca

tatra—among the viṣnubhaktis; ja-ṭa-śa-na-pāḥ—ja-rāma, ṭa-rāma, śa-rāma, na-rāma, and pa-rāma; itaḥ—its (indicatory letters); uḥ—u-rāma; ca—and; soḥ—of the viṣnubhakti su; naseḥ—of the viṣnubhakti nasi; iḥ—i-rāma; ca—and.

Among the visnubhaktis, j, t, \acute{s} , \dot{n} , and p are indicatory letters (it-s). The u of su and the i of $\dot{n}asi$ are also its.

eti gacchati na tiṣṭhatīti it, anubandhaś ca. sa ca uccāraṇārthaś cihnārtho vidhy-ādi-nimittaś ca kvacit. itaś caite—siddhopadeśe viriñcau ca saviṣṇucāpa-sarveśvara it, antya-viṣṇujanaś ca. at it ity-ādau, āṅ-māṅ-uñ-nañsu ca. viriñcau tu kvacit. dhātv-ādi-ñi-ṭu-ḍu. pratyayādyā ja-ṭa-ṇa-pāḥ. śa-ka-vargāv ataddhite. na viṣṇubhaktau ta-na-sa-mā iti. siddhopadeśā dhātu-pratyaya-viṣṇavaḥ. a-rāmādi-bhedāḥ sa-viṣṇucāpās tu vaidikāḥ. nāma-samjñaś catur-vidhaḥ. yathā—pum-lingaḥ puruṣottama-samjñaḥ, strī-lingo lakṣmī-samjñaḥ, napumsaka-lingo brahma-samjñaḥ, alingo 'vyaya-samjñaḥ. tatra sarveśvarāntāḥ puruṣottama-lingāḥ. tatra a-rāmāntāḥ kṛṣṇa-śabdaḥ. tatra prathamaika-vacane kṛṣṇa su iti sthite u-rāma uccāraṇārthaḥ.

VRTTI—An it (indicatory letter) is so named because it goes (eti): It does not remain. Another name of it is anubandha. Sometimes an indicatory letter is used to aid pronunciation (uccāraṇa), and sometimes to create a distinguishing characteristic (cihna). Sometimes it is the cause (nimitta) of the application of a rule (vidhi) or of a prohibition (pratiṣedha). The following are also its: a sarveśvara with a viṣṇucāpa in a siddhopadeśa (see below) or viriñci; the final viṣṇujana in a siddhopadeśa or viriñci; and the final viṣṇujana in at, it, and so on, and in the avyayas āṇ, māṇ, uñ, and nañ. The final viṣṇujana in a viriñci, however, is only sometimes an it. Moreover, ñi, tu and du at the beginning of a dhātu, and j, t, n, and p at the beginning of a pratyaya are also its. Ś and ka-varga are also its when they occur in a pratyaya other than a taddhita. A t, n, s, or m occurring in a viṣṇubhakti is not an it. Dhātus, pratyayas, and viṣṇus are called siddhopadeśas (elements of a word taught in their original form in books on grammar). The a-rāma and other vowels that have a viṣṇucāpa are found in the Vedas.

Samśodhini—The word *it* is derived from the *dhātu* i[n] gatau (2P, to go). The previous grammarians called the indicatory letter *anubandha* because of its similarity to the *anubandhya-paśu*, the animal tied to a post to be killed in a sacrifice. In regard to indicatory letters, Pāṇini says *tasya lopaḥ*, "An indicatory letter gets deleted" (*Aṣṭādhyāyī* 1.6.9). The phrase *na tiṣṭhati* (it doesn't remain), which is Jīva Gosvāmī's gloss of *eti* (it goes), indicates the same.

AMRTA—An example of an indicatory letter used to aid pronunciation $(ucc\bar{a}rana)$ is the u in su, and an example of being used to create a distinguishing characteristic (cihna) is the j in jas. Examples when it is the cause (nimitta) of the application of a rule (vidhi) are the n in ne, nasi, nas, and ni. And an example of being the cause of a prohibition (pratisedha) is the k in yak.

An example when a sarveśvara with a viṣṇucāpa is an i t in a dhātu is the \bar{i} in $cit[\bar{i}]$ samjñāne (vṛtti 332), in a pratyaya the u in su and i in nasi, in a viṣṇu the u in nut and tuk ($s\bar{u}tras$ 105 and 256), and in a viriñci the a of na in tasmāt so nah pumsi (95). An example when a final viṣṇujana is an it in a dhātu is the r in sphuṭir viśarane, in a pratyaya the p of tip, in a viṣṇu the t of nut, and in a viriñci the c of auc in harito ner auc (122). It was said that the final viṣṇujana in a viriñci is only sometimes an it. Examples when it is not are the final viṣṇujanas of the viriñcis pad, dat, mās, and yūṣan (sūtra 113) and the final viṣṇujanas of the viriñcis ay, ay, av, and av (sūtras 54 and 55). Since at, it, and so on (vrtti 35), and the avyayas a[n], ma[n], u[n], and na[n] are nāmas, they do not fit into the category of siddhopadeśa or viriñci. Therefore their final viṣnujanas are separately designated as indicatory letters in the vrtti.

Examples of $\tilde{n}i$, tu, and du being its at the beginning of a $dh\bar{a}tu$ are the $\tilde{n}i$ in $\tilde{n}iphal\bar{a}$, tu in tuosvi, and du in $dukr\bar{n}$. Examples of j, t, n, and p being its at the beginning of a pratyaya are the j in jas, t in $t\bar{a}$, n in nal, and p in pam. Examples of sa and sa-varga being an sa it in sa-varga that are not sa-varga are the sa-varga being an sa-varga that are not sa-varga are the sa-varga being an sa-varga in sa-varga being an sa-varga in sa-varga being sa-varga in sa-varga being sa-varga being sa-varga in sa-varga being sa-varga in sa-varga being sa-varga bein

The use of nasalized vowels (vowels with a *viṣṇucāpa*) is borrowed from the *Vedas* as a means to instruct the rules of grammar. Pāṇini and other earlier grammarians used them in that way too.

Samsodhinī—Pāṇini himself further employed the Vedic device of *svaras* (accents) in his grammar for differentiating the *ātmanepadī* and *ubhayapadī dhātus* from the *parasmaipadī dhātus*. This can be seen in *Aṣṭādhyāyī* 1.3.12 and 1.3.72. The *Siddhānta-kaumudī* (3), commenting on *Aṣṭādhyāyī* 1.3.2, says *pratijñānunāsikyāḥ pāṇinīyāḥ*: "The followers of Pāṇini say that the nasality of a vowel should be inferred by the way in which an *upadeśa* (technical term of grammar, such as a *dhātu*, a *pratyaya* or a *viṣṇu*) is treated by Pāṇini" (from *Kāśikā* 1.3.2). That is, the *viṣṇucāpa* is not actually written, but is understood by convention. In *Hari-nāmāmṛta-vyākaraṇa*, Jīva Gosvāmī usually points out the indicatory letters in the *vṛtti*, and when he does not, the commentaries supply that information. From now on, the indicatory letters will be given in square brackets for the sake of clarity, and the case and number of a word will be put in triangular brackets. The first case singular will be denoted by <1.1>, the first case dual by <1.2>, and so on.

The *sv-ādis* are listed below in table form with their indicatory letters in brackets. The uses of each case will be elaborately described in the *Kāraka-prakaraṇa*. For now, we need only know that the *prathamā viṣṇubhaktis* are also used for *sambodhana* (addressing). And this use of the *prathamā viṣṇubhaktis* is practically treated like an eighth case. Because of special rules, however, the <8.1> form of a word usually ends up being different than the <1.1> form.

case	eka-vacana	dvi-vacana	bahu-vacana
prathamā	s[u]	аи	[j]as
dvitīyā	am	au	[ś]as
tṛtīyā	[ṭ]ā	bhyām	bhis
caturthī	[n]e	bhyām	bhyas
pañcamī	[n]as[i]	bhyām	bhyas
<i>șașțhī</i>	[n]as	os	ām
saptamī	[n]i	os	su[p]
sambodhana	s[u]	аи	[j]as

In other printed editions of the *Hari-nāmāmṛta*, we see that this *sūtra* and the previous *sūtra* list the *viṣṇubhakti su* as *sū*. But this reading is inconsistent and is actually a corruption, for if we were to accept *sū* as the correct reading, the following question must be raised: "Why is the *viṣṇucāpa* written only in *sū* and not in *nasi* and in various *dhātus*, *pratyayas*, *viṣṇus*, and *viriñcis* that also have *viṣṇucāpas*? Why not be consistent and write *nasi* and so on?" There is no good reason for this.

Indeed, the fact that one *viṣṇubhakti* is written with a *viṣṇucāpa* and the other is not, although both of them are described here as having a *sarveśvara* with a *viṣṇucāpa*, makes the student search for a difference that does not exist. Pāṇini and other grammarians write the *viṣṇubhakti* merely as *su*, and are consistent in not writing the *viṣṇucāpa* of the indicatory letters. But these editions inconsistently single out *su*, writing it with a *viṣṇucāpa* while not writing the *viṣṇucāpa* of other indicatory letters. Even then, *su* is not always written with the *viṣṇucāpa*, for instance in the *sūtra: sambodhane sur buddha-samjṇaḥ* (109), and so on. Thus, to be consistent, in this edition we will list the *viṣṇubhakti* as *su*. This is justified because reliable manuscripts like manuscript 2038A (Serial No: 2897, Accession No: 2038A) in the Vrindavan Research Institute read *su*, not *su*.

Vṛtti—There are four kinds of nāmas. Their names are as follows: pumlinga (masculine) is called puruṣottama, strī-linga (feminine) is called lakṣmī, napumsaka-linga (neuter) is called brahma, and alinga (that which has no gender) is called avyaya.

Among the four kinds of $n\bar{a}mas$ are the masculine words, and among masculine words are those ending in a $sarve\acute{s}vara$. Among them is the word krsna, which ends in a- $r\bar{a}ma$. In the first case singular, we have krsna + s[u]. The u in s[u] is an indicatory letter used for pronunciation.

९२। विष्णुभक्तिसिद्धं विष्णुपदम्।

92. visnubhakti-siddham visnu-padam

viṣṇubhakti-siddham—achieved by a viṣṇubhakti; viṣṇu-padam—a viṣṇupada (inflected word).

That which is formed by the application of a viṣṇubhakti is called a viṣṇupada.

viṣṇubhakti-siddham nāmno dhātor vā rūpam viṣṇupada-samjñam syāt. padam iti prāñcaḥ.

VRTTI—The form of a *nāma* or of a *dhātu* achieved through the application of a *viṣṇubhakti* is called *viṣṇupada*. Earlier grammarians called it *pada*.

AMRTA—The word *pada* can mean feet or abode. Thus the implied meaning is that Lord Viṣṇu's feet or abode is achieved only through devotional service to Him (*viṣṇu-bhakti*).

९३ । सररामयोर्विष्णुसर्गो विष्णुपदान्ते ।

93. sa-ra-rāmayor viṣṇusargo viṣṇupadānte

sa-ra-rāmayoḥ—of sa-rāma and ra-rāma; viṣṇusargaḥ—the replacement viṣṇusarga; viṣṇupada-ante—when the viṣaya (sphere of application) is viṣṇupadānta.

Sa-rāma and ra-rāma become viṣṇusarga when the viṣaya is viṣṇupadānta.

prān-nimittam tathā kāryī kāryam para-nimittakam | atra krameņa vaktavyam prāyah sūtreṣu sarvatah || kvacit para-nimittasya sthāne viṣaya-saptamī | kārya-pūrve pañcamī syāt kārya-sthāne tu ṣaṣṭhikā || kārye tu prathamā vācyā saptamī viṣaye pare | vinā-yoge niṣedhārtham dvitīyā kvacid iṣyate || sarvāngāsambhavo yatra sv-alpāny angāni tatra tu | ato bālaka-bodhāya padam vicchidya mūrdhani | ankā deyā viṣṇubhakti-vyakty-artham sarva-sūtrataḥ ||

yathā—sa-ra-rāmayor iti kārya-sthānam, viṣṇusarga iti kāryam, viṣṇupadānto viṣayaḥ. para-nimittam pūrva-nimittam cātra nāsti. tat tac ca yathā—i-dvayam eva yaḥ sarveśvare ity atra para-nimittam sarveśvaraḥ. tataḥ śaś cho vety atra pūrva-nimittam viṣṇudāsaḥ. viṣṇujana ity-ādau ha-rau vineti tau niṣiddhau. tad evam prathamāyā eka-vacane kṛṣṇaḥ. dvi-vacane kṛṣṇa au, o-dvaye au, kṛṣṇau. bahu-vacane kṛṣṇa jas, ja it cihnārthaḥ śas-ādi-bheda-jñāpanāya. evam uttaratrāpi. trivikrama-viṣṇusargau—kṛṣṇāḥ.

Vṛtti—Generally, in the $s\bar{u}tras$ of this book, things are mentioned in this order: $pr\bar{a}n-nimitta$, $k\bar{a}ry\bar{\imath}$, $k\bar{a}rya$, para-nimitta. Sometimes, a $vi\bar{\imath}saya-saptam\bar{\imath}$ is in place of the para-nimitta.

B $\bar{\mathbf{A}}\mathbf{L}\mathbf{A}$ —The word "generally" is used, as there is not always a *prān-nimitta*, $k\bar{a}ry\bar{\iota}$, $k\bar{a}rya$, and *para-nimitta* in every $s\bar{\iota}tra$.

Samśodhini—The terms *prān-nimitta*, *kāryī*, *kārya*, and *para-nimitta* were already defined and explained in *Amṛta* 44 and in *Samśodhinī* 44. *Viṣaya-saptamī* refers to a *saptamī* viṣṇubhakti used to denote the viṣaya. This has already been seen in cases like viṣṇupadānte (when the viṣaya is viṣṇupadānta) and so on (*Samśodhinī* 57).

Vṛtti— $Pañcam\bar{\imath}$ is used when there is a $pr\bar{a}n$ -nimitta ($k\bar{a}rya$ - $p\bar{u}rva$), $sasth\bar{\imath}$ when there is a $k\bar{a}ry\bar{\imath}$ ($k\bar{a}rya$ - $sth\bar{a}na$), $pratham\bar{a}$ when there is a $k\bar{a}rya$, and $saptam\bar{\imath}$ when there is a visaya or a para-nimitta.

Sometimes, for the sake of exclusion ($ni\underline{s}edha$), $dvit\overline{i}y\overline{a}$ is used in relation to that which is syntactically connected with the word $vin\overline{a}$. When all the elements do not apply [in a $s\overline{u}tra$], at least a few are present.

AMRTA—The words "all the elements" refer to the five elements beginning from *prān-nimitta*, which were mentioned previously. Due to the use of the word "generally," all five elements do not have to be present in every *sūtra*.

Vṛtti—Therefore, to enligthen children, in each $s\bar{u}tra$ one should split the words [where there is sandhi] and put a number on top of each word so that the visnubhakti will be clear.

Samsodhini—Thus, according to this recommendation, we would write the current $s\bar{u}tra$ as: sa-ra- $r\bar{a}mayoh$ visnus argah visnup ada-ante. However, since this edition already contains a word-for-word section that clarifies the visnub hakti, we will not follow this system. In the word-for-word section, "after..." indicates a $pr\bar{a}n$ -nimitta; "of..." indicates a $k\bar{a}ry\bar{i}$; "the replacement...", "the change to...", "the deletion...", or "the $\bar{a}gama$..." indicates a $k\bar{a}rya$; "when a ... follows" indicates a para-nimitta; and "when the visaya is..." indicates a visaya- $saptam\bar{i}$.

VRTTI—For example, sa-ra-ramayoh is a karyi, visnus argah is a karya, and visnup adante is a visnup adante in vi

```
\blacktriangleright kṛṣṇa + s[u] \rightarrow kṛṣṇas \rightarrow (93) kṛṣṇaḥ <1.1>.
```

 $[\]triangleright$ kṛṣṇa + au \rightarrow (49) kṛṣṇau <1.2>.

 $[\]blacktriangleright$ kṛṣṇa + [j]as \rightarrow (42) kṛṣṇās \rightarrow (93) kṛṣṇāḥ <1.3>.

SAMŚODHINĪ—After removing the indicatory letters and applying the current *sūtra*, the *viṣṇubhaktis* are as follows:

case	eka-vacana	dvi-vacana	bahu-vacana
prathamā	ḥ	аи	аḥ
dvitīyā	am	аи	аḥ
tṛtīyā	ā	bhyām	bhiḥ
caturthī	е	bhyām	bhyaḥ
pañcamī	аḥ	bhyām	bhyaḥ
<i>șașțhī</i>	аḥ	оḥ	ām
saptamī	i	оḥ	su
sambodhana	<u></u>	аи	аḥ

At this point, we will explain the basic meanings of each case by using the word *suhrd* (friend), since it does not require any special rules except the deletion of *s[u]* by *rādhā-viṣṇujanābhyām īpaś ca trivikramāt sor haraḥ* (138). For the sake of clarity, *sandhi* has not been done in the following examples.

- 1) $Pratham\bar{a}$ (nominative case) is used to indicate the subject of a verb in the active voice or the object of a verb in the passive voice.
 - > suhṛd vadati (The friend speaks).
 - > suhṛd śliṣyate (The friend is embraced).
- 2) $Dvit\bar{\imath}y\bar{a}$ (accusative case) is used to indicate the object of a verb in the active voice. Sometimes this case is expressed in English by the preposition "to".
 - > suhṛdam paśyāmi (I see a friend).
 - > suhṛdam vadāmi (I'm talking to a friend).
- 3) Trtiva (instrumental case) is used to indicate the instrument, or in other words the means by which an action is accomplished. It is expressed in English by the prepositions "by" and "with." Trtiva is also used to indicate the subject of a verb in the passive voice and is also expressed through the preposition "by".
 - > suhṛd kareṇa khādati (The friend eats with [his] hand).
 - > kṛṣṇaḥ suhṛdā śliṣyate (Kṛṣṇa is embraced by the friend).
- 4) *Caturthī* (dative case) is used to indicate the beneficiary who is the indirect object of a verb. It is expressed in English by the preposition "to".
 - > suhṛde dānam dadāmi (I give a gift to a friend).

- 5) **Pañcamī** (ablative case) is used to indicate the source. It is expressed in English by the preposition "from".
 - > suhṛdaḥ dānam pratigṛhṇāmi (I receive a gift from a friend).
- 6) Ṣaṣṭhī (genitive case) is used to indicate possession or intimate relation. It is expressed in English by "'s" or the preposition "of."
 - > suhṛdaḥ putraḥ (A friend's son).
 - > suhrdah grham (The house of a friend).
- 7) **Saptamī** (locative case) is used to indicate the location. It is expressed in English by the prepositions "in," "on," or "at."
 - > suhṛdi viśvāsaḥ (Confidence in a friend).
 - > suhrd grhe asti (The friend is at home).
- 8) Sambodhana (vocative case) is used to address somebody.
 - > he suhrd (O friend).

Each of these cases, however, has many other meanings, which will be explained in the $K\bar{a}raka$ -prakaraṇa. Therefore the names of the case endings, such as the instrumental case, are sometimes misleading. Another example is the genitive case, which is used in the sense of the accusative case when the $kriy\bar{a}$ (action) connected to the direct object is one of several specific participles (642).

९४ । दशावतारादम्शसोररामहरः ।

94. daśāvatārād am-śasor a-rāma-harah

daśāvatārāt—after a daśāvatāra; am-śasoḥ—of the viṣṇubhaktis am and [ś]as; a-rāma-haraḥ—deletion of a-rāma.

When am or [s] as comes after a daśāvatāra, its a-rāma is deleted.

kṛṣṇam. haro 'yam jñāpayati—sūtre pratyaya-rūpa-nimittād anyasya haro 'pi mahāhara iti. tenaikātmaka-mātra-nimittatvān na trivikramaḥ. dvitīyā-dvitve kṛṣṇa au—kṛṣṇau. pūrva-vad bahutve kṛṣṇa śas—śa it, a-rāma-haraḥ. eka-deśa-vikṛtam ananya-vat, tathāpi tan-nāmaivety arthaḥ. tataś ca.

Vṛtti—>
$$kṛṣṇa + am \rightarrow (94) kṛṣṇa + m \rightarrow kṛṣṇam < 2.1>.$$

This hara informs us that in a sūtra the hara of something other than a nimitta that is a pratyaya is considered a mahāhara. Therefore the change

to trivikrama does not take place, because in $s\bar{u}tra$ 42 the nimitta is just an $ek\bar{a}tmaka$. In the second case dual we have krsna + au, which becomes krsnau.

 \blacktriangleright kṛṣṇa + au \rightarrow (49) kṛṣṇau <2.2>.

In the second case plural, we have krsna + [s]as. The s, like the j of [j]as described in the previous vrtti, is an indicatory letter employed to create a distinguishing characteristic (cihna). The $a-r\bar{a}ma$ of [s]as undergoes hara by the current $s\bar{u}tra$, and then the following rule applies in accordance with the maxim eka-desa-vikrtam ananya-vat, "even though something is deficient in one place, it is still called the same thing" (vrtti) 85).

AMRTA—Someone might argue, "Why isn't daśāvatāra ekātmake militvā trivikramah (42) applied in kṛṣṇam? The deleted a-rāma should be considered as the original (sthāni-vat) as it is not stated here that it undergoes mahāhara, and therefore sūtra 42 should apply." Jīva Gosvāmī addresses this concern with the sentence beginning "This hara." This sentence includes an important paribhāṣā worth remembering: sūtre pratyaya-rūpa-nimittād anyasya haro 'pi mahāharaḥ, "In a sūtra the hara of something other than a nimitta that is a pratyaya is considered a mahāhara. The word sūtre (in a sūtra) here means śankita-vidhi-sūtre (in a vidhi-sūtra which is suspected to be applicable). In regard to daśāvatāra ekātmake militvā trivikramah (42), a sūtra ordaining trivikrama which is suspected to be applicable, the a of am isn't a pratyaya nimitta, rather it is an ekātmaka nimitta. Therefore the hara ordained in the current sūtra is a mahāhara. This means that the a of am is completely obliterated and thus the a of krsna can no longer join with it and become trivikrama. If the hara had not been considered a mahāhara, trivikrama would still occur and we would get the unwanted form kṛṣṇām <2.1>, since in a hara the grammatical operations still take place by accepting that the deleted element is sthāni-vat (like the original). Someone may further argue, "In the next $s\bar{u}tra$, how can /s/as be the para-nimitta when the a of /s/as is deleted by the current sūtra?" To settle this doubt, Jīva Gosvāmī quotes the maxim ekadeśa-vikṛtam ananya-vat to show that even though the a of /ś/as undergoes hara, the remaining s is still called [s]as.

९५ । दशावतारस्य त्रिविक्रमः शसि , तस्मात्सो नः पुंसि ।

95. daśāvatārasya trivikramaḥ śasi, tasmāt so naḥ pumsi

daśāvatārasya—of a daśāvatāra; trivikramaḥ—the change to trivikrama; śasi—when [ś]as follows; tasmāt—after that; saḥ—of sa-rāma; naḥ—na-rāma; pumsi—when the visaya is the masculine gender.

A $daś \bar{a} v a t \bar{a} r a$ becomes trivik r a m a when $[\dot{s}] a s$ follows. After that, the s of $[\dot{s}] a s$ becomes n if the $v \dot{s} \dot{a} v a$ is in the masculine gender.

kṛṣṇān.

VRTTI
$$\rightarrow$$
 $krsna + [s]as \rightarrow (94) krsna + s \rightarrow (95) krsnā + s \rightarrow krsnā + n \rightarrow krsnān < 2.3>.$

९६ । अरामान्तः कृष्णसंज्ञः ।

96. a-rāmāntaḥ kṛṣṇa-samjñaḥ

a-rāma-antaḥ—ending in a-rāma; kṛṣṇa-samjñaḥ—called kṛṣṇa.

Any nāma ending in a-rāma is called kṛṣṇa.

९७ । कृष्णात् टा इनः ।

97. kṛṣṇāt tā inaḥ

kṛṣṇāt—after a kṛṣṇa (a word ending in a-rāma); ṭā—of the viṣṇubhakti [ṭ]ā; inaḥ—the replacement ina.

After a krsna, $[t]\bar{a}$ is replaced by ina.

teti sūtra-balena lupta-ṣaṣṭhī, spaṣṭatārtham asandhiḥ. evam anyatrāpi. kṛṣṇa ina, a-dvayam i-dvaye e—kṛṣṇena.

Vṛtti— $T\bar{a}$ is a word whose $sasth\bar{i}$ viṣṇubhakti has been deleted on the strength of a $s\bar{u}tra$ ($Ast\bar{a}dhy\bar{a}y\bar{i}$ 7.1.39), and which, for clarity's sake, does not undergo sandhi. Such is the case elsewhere also.

$$\triangleright$$
 kṛṣṇa + [t]ā \rightarrow (97) kṛṣṇa + ina \rightarrow (43) kṛṣṇena <3.1>.

AMRTA—There is no *sandhi* between *tā* and *ina* by the following *paribhāṣā*—sandhir anityaṁ sūtra-nirdeśe, "Sandhi is not compulsory when composing a sūtra" (Bṛhat 44).

Samsodhinī—In this *sūtra*, the sixth case singular form *tā* is irregular. Usually, when *[n]as* is applied after *tā* to form the sixth case singular, we get *taḥ* (*sūtra* 114). The *ṣaṣṭhī viṣṇubhakti [n]as*, however, is irregularly deleted here by *supām su-luk-pūrva-savarṇāc-che-yā-ḍā-ḍyā-yāj-ālaḥ* (*Aṣṭādhyāyī*

7.1.39), a *sūtra* that describes, among other things, the *luk* (*mahāhara*) of the *sups* (*sv-ādis*) sometimes seen in the Vedas. Thus to clearly instruct the rules of grammar, Jīva Gosvāmī again employs a Vedic device, the deletion of the *sv-ādis*, just as he earlier used the Vedic device of nasalized vowels (*sarveśvaras* with a *viṣṇucāpa*) to distinguish indicatory letters.

AMRTA—The word *sūtra-balena*, in the *vṛtti*, indicates the usage found in the *Vedas*.

SAMŚODHINĪ—The phrase *sūtra-balena* in the *vṛtti* indeed refers to *Aṣṭādhyāyī* 7.1.39 as seen by referencing Jīva Gosvāmī's *Laghu-vaiṣṇava-toṣanī* (10.6.22) in which he writes, *aṅghri-jānv ity anayoḥ "supām su-luk" ity-ādi-chāndasa-sūtreṇa su-luk*, "The *luk* (*mahāhara*) of the case endings of the words *aṅghri* and *jānu* takes place in accordance with the Vedic *sūtra* beginning *supām su-luk*." This statement explains the irregular forms *aṅghri* <2.2> and *jānu* <2.2> found in the *Bhāgavatam* (10.6.22). The usual forms would be *aṅghrī* <2.2> and *jānunī* <2.2>, but in the *Bhāgavatam* the second case dual endings of these words undergo *mahāhara* by *Aṣṭādhyāyī* 7.1.39.

९८ । कृष्णस्य त्रिविक्रमो गोपाले ।

98. kṛṣṇasya trivikramo gopāle

kṛṣṇasya—of a kṛṣṇa; trivikramaḥ—the change to trivikrama; gopāle—when a gopāla follows.

The final a of a krsna becomes trivikrama when a gopāla follows.

eka-varṇa-vidhir ante pravartate—kṛṣṇābhyām.

VRTTI—A rule that is in reference to a single varna is applied at the end.

 \blacktriangleright kṛṣṇa + bhyām \rightarrow (98) kṛṣṇā + bhyām \rightarrow kṛṣṇābhyām <3.2>.

SAMŚODHINĪ—In accordance with the maxim *eka-varṇa-vidhir ante* pravartate in this vṛtti, we understand that although the sūtra literally says, "A kṛṣṇa becomes trivikrama when a gopāla follows," the actual meaning is that the final a of a kṛṣṇa becomes trivikrama when a gopāla follows. This paribhāṣā has also been applied in the translation of quite a few sūtras from here to the end of the treatise.
